

Submission No.: PG03-9381

Session : Postgraduate Course 3 (Liver)

Date & Time, Place : November 16 (Thu), 10:30-12:00, Room 3F-1

Session Title : How do I do(Lap/Robotic RL): Parenchymal division & BD division

Individualized bile duct division angle

Yasir Alnemaary

King Faisal Specialist Hospital and Research Center, Saudi Arabia

Dividing bile duct in living donor hepatectomy in the no return point of the surgery. Clear identification and cutting of the duct is undebatable importance for both donor and potential recipient. Our method of identification of bile duct bifurcation and accurate exposure of the haptic hilum and cutting angle will be shown. The key principle is ensuring donor safety, stump with adequate hilar plate and avoiding side cuts.
